Defoamer 2080

Defoamer 2080 is an active non-silicone defoamer designed to eliminate foam. Defoamer 2080 is extremely effective in both acidic and alkaline aqueous solutions. Stable to a wide pH range of 3 – 11.

Features/Benefits

- Water dilutable.
- Effective in extreme pH conditions.
- Easily dispersed.
- Does not interfere with turbidity monitors.
- Packaged in recyclable containers.
- Not damaged by freezing.

Operating Conditions

1. Concentration of product varies with application. Perform trials to determine the level of foam control desired.
2. Agitate product prior to use.
3. For optimal dispersion add product with agitation.
4. If possible, add product prior to the point where foaming occurs within the system.
5. A suggested guideline to start trial should be 0.5% - 1% b.v. and then adjust accordingly.

The data and statements contained in this bulletin are based on testing information and are believed to be accurate and reliable. This bulletin is not a Guarantee or Warranty, express or implied regarding the products use. The product is sold on the condition that the purchaser will do their own tests to determine the suitability of the product in a particular application.
